February 11-world patient day, on this date, on the initiative of the Federal state budgetary institution of science "Institute of immunology and physiology of the Ural branch of the Russian Academy of Sciences" (IIF Uro RAS), the Ministry of health of the Sverdlovsk region, Yekaterinburg will be held

I International Congress "Doctor-Patient: Immunology 2021"

February 11-12, 2021.

The following events will be presented At the venues of this Congress:

*** International forum "Immunology 2021", dedicated to the 35th anniversary of the service of clinical immunology in the Urals, the foundations of which were laid in the Regional children's clinical hospital, the event will be held on 11.02.2021.**

*** I interregional Meeting of Patient organizations, the event will be held on 11.02.2021.**

*** I regional Scientific and practical conference "Patient-oriented approach in medicine", the event will be held on 11-12. 02. 2021.**

The goal is to attract public attention to the problems of sick people, create an information space in the field of medicine, promote the development of medical knowledge among both medical professionals and patients, develop and improve mechanisms for interaction between medical organizations, authorities and public organizations to improve the quality of life of patients, discuss the features of medical organizations during the COVID 19 pandemic, create a platform for dialogue between the medical community and the authorities, where the voice of patient communities should be heard.

Organizers:

Ministry of health of the Sverdlovsk region

Federal state budgetary institution of science Institute of immunology and physiology of the Ural branch of the Russian Academy of Sciences (IIF Uro RAS)

Co-organizers:

Ural state medical University of the Ministry of health of the Russian Federation

International educational project on primary immunodeficiency "J Project"

ESID – European society of primary immunodeficiency

Sverdlovsk regional children's clinical hospital

Sverdlovsk regional scientific and practical society of therapists named after B. p. Kushelevsky

Association of anesthesiologists and resuscitators of the Urals

Sverdlovsk regional cancer clinic

The technical provider of the event Kamkor-Integration group of companies

Directions of the scientific program

*** I International Forum « Immunology 2021»**

Currently, the development of advanced knowledge in various fields of science, including medical science, confirms that all physiological functions of the body are regulated and carried out due to the functioning of the Central regulatory mechanisms of immunity and various immune mechanisms, when violated, diseases are formed that are genetically determined and depend on various environmental factors. This knowledge helps in the implementation of the progress of medical science, as well as is required for the diagnosis of diseases, for the development and use of new generation medicines. And the immune system itself is a complex of reactions aimed at maintaining the constancy of the internal environment of the body. All advances in medicine are related to the knowledge of immunology. Currently, this fact has become obvious and no branch of medicine can exist without this knowledge, and thus, at present, immunology is the main fundamental and applied discipline that ensures the progress of medicine. The program of this Forum will cover fundamental and applied issues of immunology, its significance in various branches of medicine:

- DERMATOLOGY
- GENETICS
- LABORATORY DIAGNOSTICS
- OBSTETRICS AND GYNECOLOGY
- ONCOLOGY
- OTORHINOLARYNGOLOGY
- PATHOMORPHOLOGY
- PEDIATRICS
- PULMONOLOGY
- RHEUMATOLOGY
- SURGERY
- THERAPY
- TRANSPLANTOLOGY

The Forum program will be submitted for accreditation under the NMO system.

*** I interregional Meeting of Patient organizations**

This event will be the first large-scale event in Russia with the participation of patient, medical and scientific communities that will unite on one platform. They will hear each other and find common ways to resolve issues. This event will be attended by experts and representatives of international organizations. Within the framework of this event, reports on major chronic diseases will be presented to patients and employees of patient organizations, which will highlight the main issues of new opportunities in prevention, treatment and rehabilitation, social and legal issues.

*** I interregional Scientific and practical conference «Patient-oriented approach in medicine»**

The concept of a patient-centered approach is a key element of the quality of medical care and sounds like this: "The care provided must meet the individual preferences, needs and values of patients and take into account the patient's wishes when making clinical decisions." Patient-oriented approach. * sensitive attitude to the patient • awareness of the patient's responsibility for their health and involvement in cooperation • improvement of patient-specialist interaction. The conference will cover the main issues of this approach in various areas of medicine, such as:

- ANESTHESIOLOGY-RESUSCITATION
- CARDIOLOGY
- DERMATOLOGY
- GASTROENTEROLOGY
- GENETICS
- LABORATORY DIAGNOSTICS
- NEPHROLOGY
- NEUROLOGY
- OBSTETRICS-GYNECOLOGY
- ONCOLOGY
- OTORHINOLARYNGOLOGY
- PEDIATRICS AND IMMUNOLOGY
- PULMONOLOGY
- REHABILITATION
- RHEUMATOLOGY
- SURGERY
- THERAPY

The Conference program will be submitted for accreditation under the NMO system.

Leading experts in the field of medicine from Yekaterinburg, Moscow, St. Petersburg and other cities of the Russian Federation, as well as attracted foreign experts will speak at the Congress. In total, more than 100 speakers are expected to participate.

It is expected that the opinion of the patient community will be presented by more than 10 public organizations of patients, as well as experts of public councils for the protection of patients' rights under Federal and regional authorities.

Audience of the scientific and practical conference: immunologists, pediatricians, primary care doctors, diagnosticians, narrow specialists, doctors of related specialties, sociologists, lawyers. The expected number of participants is more than 1500 people.

Due to the unfavorable epidemic situation, the event will be held in an online environment.

Sincerely, Chairman of the program Committee

Honored worker of science of the Russian Federation, MD, Professor,

Chief researcher of the IIF of the Ural branch of the Russian Academy of Sciences,

Chief children's immunologist of the MOH SO Tuzankina I. A.
